Computer Area

Maya has always been interested in computers since both her parents are working constantly on their own. Over the past few weeks Maya has been wanting to do "typing". After finding some Online games Maya has been practicing her typing using the keyboard. She already can identify where some of the letters are on the keyboard and knows some of the functions such as enter, backspace, space bar etc. She also enjoys playing games on the laptop as well.

Benefits of Computer Area

Children develop perseverance
