Importance Of Art

When your child applies paint to paper, glues things together or pounds a lump of clay, they experiment with colour, shape, design and texture.

Your child expresses their individual ideas and feelings with art materials and learns to value and appreciate differences.

Art enables your child to assert individuality, helps to develop planning skills, fine motor skills and creativity.

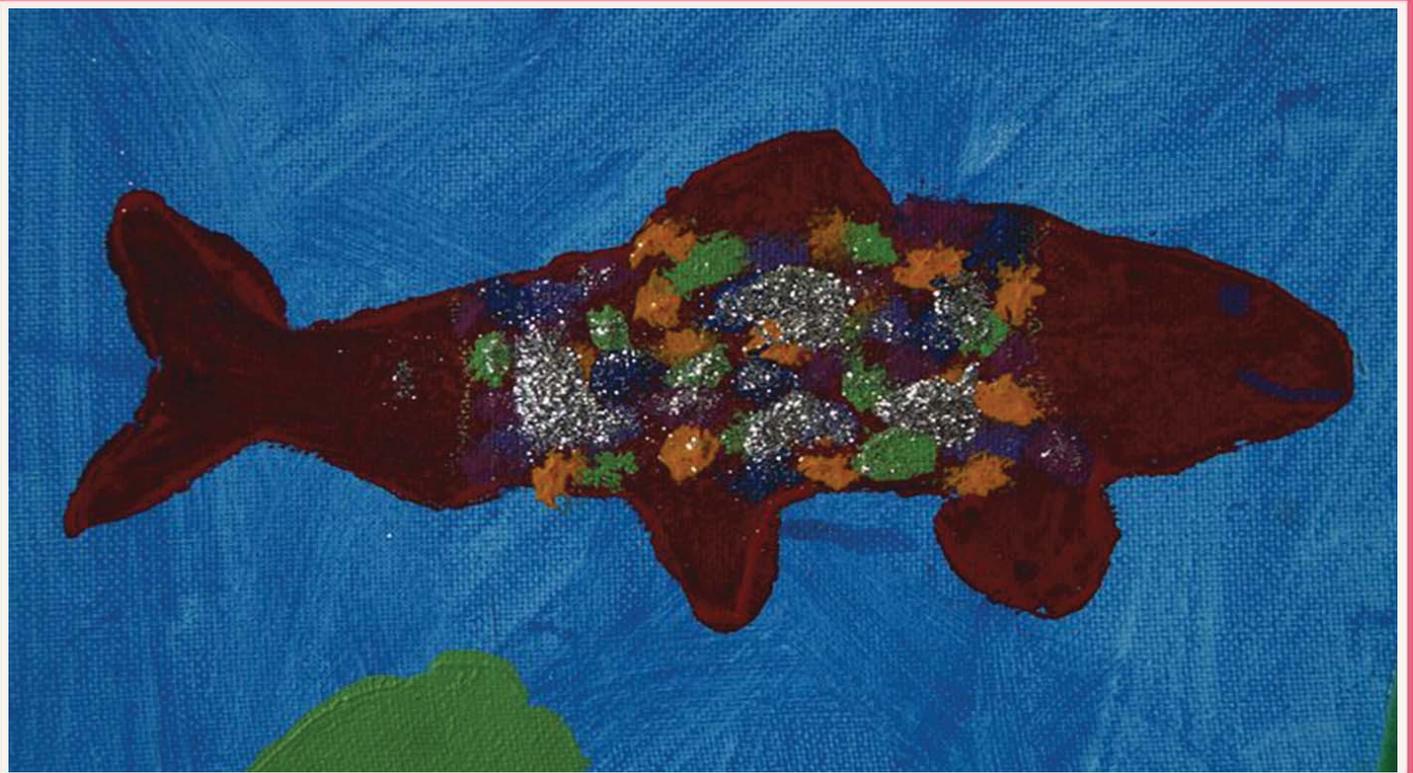

The purpose of art experiences is to allow your child to explore on their own, using materials in ways. This enables your child to learn that their own abilities are valued and they will begin to freely participate in the creation of art.

Art is a great tool to use to promote your child's learning.

The Red Storm

The Work Of Art

When they were little, they scribbled-
As for colours, they didn't care.
Their fists held tight around the crayons;
Circles and lines were everywhere.

Through time their talents surfaced-
And true artists they have become.
Shapes and colours now have meaning,
It's not like when they were one.

They have learnt to stay within the lines-
To cut, to paint and paste and glue;
A truly art masterpiece, who knew!

Time and effort to paint each piece-
No, reason, no thought of waste.
Cautiously the works evolves;
Little fingers full of coloured paint.

For the moment, time stands still-
Your Child creating, something new.
This pure and priceless book of art
Of memories which you will never part!
