

Name: Brett Harrison

Experience: Dinosaur Museum Visit

Date: April 13, 2018

On Friday, the preschoolers went on an excursion to the Dinosaur Museum. We have been following their interest - where Dinosaurs have been a main topic of discussion, so we thought this was the perfect opportunity. As we arrived at the museum we saw Dinosaurs set up outside. After taking a few photos, we met with our tour guide Dylan who showed us all around the museum and spoke to us about all the dinosaurs. We also saw dinosaur skeletons - "that's a big dinosaur" Monty said pointing to the T- Rex. Dylan began talking about the T- Rex and feeling us about what it eats, where it lived and more.. After our tour we were lucky enough to dig for fossils and pretend to be archeologists. We also got to feel real dinosaur bones "they are heavy" Anita commented. "We can do this at school as well" - Fred said as we continued onto lunch.

Analysis Of Learning

The Preschoolers showed that they are enthusiastic and curious within the learning. While at the museum, they participated in a variety of rich and meaningful inquiry based experiences and followed and extended on their own interests with enthusiasm, energy and concentration,
