

### The Learning Story

"Did you notice the moon" - Joseph said when he came into the room. " It was so big, it looked like I could see a face on it" Joseph commented. I, went to the book shelf and found the space book. We saw what Earth looked like from Space "I can see so much blue. that the water on Earth" Joseph commented. Next we looked at Nebula "it looks like glitters in the sky" Angie said. "That's call a Nebula - it's a cloud of gas and dust in space. "Do you think we could make a nebula - using paints and glitters" Joseph asked. "What a great idea" Angie said. We set off finding materials to make our own Nebulas.

### Analysis Of Learning

It is evident, that the Preschoolers use play to investigate, project and explore new ideas (2.4.1). It is also evident that they explore relationships with living things and observe, notice and respond to change (2.4.6).

### What's Next

- Create our own Planetarium
- Space discussions
- Add space materials

### Parent Input

"Joseph was so excited to see the moon - he has been interested in space over the last few days" - Anna
