Daily News

(Doo, Doo, Doo, Doo, Doo, Doo)

Today's Feature Experiences

- Potato Prints
- Bug n Mud
- Play dough Pressing
- Sorting Coloured Stones

Possible Future Ideas

- Use Natural Materials for Sorting
- Investigate bugs in the outdoor area.
- Add book on bugs, magnify glasses, clipboards, pencils, paper, photos of bugs in the garden on a small table
- Add scissors to play dough area and insect play dough mats

Monday, 1 October, 2018

Potato Prints

The children asked if it was possible to stamp with the vegetables, using the cut off from the kitchen we are doing vegetable prints. Today was potatoes. The children enjoyed seeing the different patterns the potatoes made. This experience encourages children to recognize patterns (5.4.6).

Bugs N Mud

We had setup the bug in the mud outside in the trough along with laminated bug pictures. Children were asked to find the bug in the mud and match it to the laminated picture card. During this activity, the children persevered and experienced the satisfaction of achievement (4.1.7).

Play dough Pressing

Play dough is a popular activity for the children. It develops their hand eye coordination as well as strengthens their finger muscles. The children were given moulds that they filled with play dough, pressed together really hard which in turn created their shape. Children are beginning to manage tools with increasing competence and skill (3.2.7).

Sorting Coloured Stones

The children worked together in pairs to sort the coloured stones. Some children matched the stones based on the colours, while others counted the stones and added them to the corresponding number. In this experience the children have shown they increasingly cooperate and work collaboratively with others (3.1.5).
