

I Play, I Grow, I Achieve

Experiences I've Enjoyed

Jack has enjoyed a variety of activities, with his favourite being sensory experiences. Goop and water play are both experiences that Jack spends quite a bit of time with as he enjoys messy play. Using different materials he likes to manipulate different textures and he also is fond of using buckets and water wheels. Jack also has an interest in animals. With our animal incursion we had he was eagerly ready to touch all the animals presented including lizards and snakes. He was very gentle and listened attentively to the presentation! Awesome Jack!

Achievements I've Made

Since Jack has become more confident in walking over the past few months, he has also become more independent. He enjoys taking off to different areas of the room and playing with the activities that have been set up. His vocabulary and talking has also increased to simple word answers and he shows that he has an understanding of what is being said to him through his answer, body language. Jack has also shown a keen interest in singing simple songs and will often join in increasing his understanding of words and vocabulary.

Friendships I've Developed

Jack enjoys playing along side all his peers in the room. He shares the materials with others and enjoys interacting with them. He has formed a special bond with Maisy and Harris. As Maisy enters the room he hugs her and when going outside he always makes sure that she is with him playing together. Jack also enjoys having Harris as a friend. Together they play on the playground equipment and ride the tricycles. Also at lunch time, they always sit together. Jack has developed a special bond and has a good time with both of them!
