

Our Learning Collage

Date:

Friday, 23 April 2021

To practice our fine motor skills we did threading with beads. This helps to strengthen our fingers.

At the writing table, the children asked if they could practice writing the first letter of their name.

During group time, we took it outside and planted a tree together.

Children practiced their cutting skills using small knives and playdough.

For art today,, the children used their fingers to create their own painting.

The children used the small coloured blocks to create their own buildings.

We did a science experiment. Adding skittles to milk and seeing their reaction.

Continued playdough play. Children made own creations using coloured playdough.

Today's Feature Experiences

- Planting an outdoor garden.
- Science Experiment (milk and skittles).
- Finger painting.
- Finger Exercise table.
- Writing our names.
- Block creations.

Extension Of Learning

- Adding family rocks to the outdoor garden.
- Continue science experiments using milk.
- Use different mediums during art for free expression.
- Add more finger exercise activities for children to engage in.
- Add a children's sign in/out area.
- Cutting fruits (fruit salad).
