

# A Peek At Our Week

**Week Beginning:** 2/8/21 - 6/8/21

## Our Week Of Learning

We introduced a vegetable garden and planted lettuce which has started growing this week. Children also decided to make pet rocks and creatures to add to the garden. We set up a fine motor skills table which has engaged all children - we have included dropper water transfer, and tweezer cotton ball pick up. Children have also shown an interest in shapes. For meal times we have encouraged the children to serve themselves their own food. We have added serving spoons, tongs to bowls of food during lunch. Group time we have had discussions on being respectful and nice to one another. What should we do and say when we don't like what our friends are doing to us and what we say when we feel angry.

## Reminders

Parents, children have shown an interest in creating different art projects, any recycle materials that you could bring in would be fantastic!

We request you to fill out the contact information form available in sign in area. Details such as E-mails, phone numbers need to be updated periodically.

Please bring a spare set of clothes for your child, labelled with their name also include a jumper for cooler days.
