

# Standard 3 - Families And Communities Are Informed And Involved

## Why is this Standard important?

Children feel more valued when this happens, and when organisations are more accountable for their child safe practices.

- Leaders and staff encourage families to take an active role in keeping children safe.
- Policies and procedures (including Codes of Conduct) are clearly communicated to parents and carers.
- Families and community members are encouraged to provide feedback on how the organisation keeps children safe, and this information is acted upon where necessary.
