

Standard 8 - Physical And Online Environments Minimise The Opportunity For Abuse Or Other Kinds Of Harm To Occur.

Why is this Standard important?

Perpetrators exploit situations where they can be alone with children or use the online environment to extend their connection and influence.

- Leaders set expectations about behavioural standards for staff interacting with children in physical and online environments.
- Risk assessments identify areas where adults have opportunities to interact with children unsupervised, including for one-off events and overnight camps.
- Physical environments are altered to increase natural lines of sight while respecting a child's right to privacy.
