

# Eastern Brown Snake

**Also known as:** common brown snake

**Found:** throughout the eastern half of mainland Australia

Fast-moving, aggressive and known for their bad temper, eastern brown snakes, together with other browns are responsible for more deaths every year in Australia than any other group of snakes. Not only is their venom ranked as the second most toxic of any land snake in the world (based on tests on mice), they thrive in populated areas, particularly on farms in rural areas with mice.
