

Sensory Play

Sensory experiences enable children to use their senses to explore and manipulate objects. Through touch, smell, hear, seeing and tasting it contributes to a child's overall learning. When exploring through sensory play children will also begin to classify objects based on different textures, which is an important part of learning.

Linking To The EYLF Outcomes

- 4.2 Children develop a range of learning and thinking skills and processes such as problem-solving, inquiry, experimentation, hypothesising, researching and investigating
- 3.2 Children become strong in their physical learning and wellbeing
- 3.3 Children are aware of and develop strategies to support their own mental and physical health and personal safety
