

Sustainable Energy Practices In Early Childhood Services

How We Reduce Energy In Our Service

- Use a washing line to dry clothes rather than a dryer.
- Ensure all computers, printers, photocopiers, air cons and lights are turned off at the end of the day.
- Switch to compact, efficient globes.
- Only use air conditioner when natural ventilation is inadequate, closing doors and windows when on.
- Separate the lighting circuit for the nursery, change room and main children's room, to turn on when necessary.
